*Dear researchers, colleagues and readers,*

*Transportation is the means by which all people are connected, all human activities occur. Nowadays, in strong globalizing process, community activities have not been limited by countries' borders; thus transportation becomes non-confrontiers.*

*We, transportation makers, in this moment, have had a common forum to together discuss, contribute, share and dedicate.*

*First Especial Issue of international co-operating transportation science journals of State Technical University (MADI)-Russia, South West Transportation University (SWJTU)-China and University of Transportation and Communication (UTC)-Vietnam is published in spring – season of blooming and developments.*

*We wish you and our transportation career were achieved, prosperous and fruitful.*

*Science is non-limitation,*

*Transportation is non-border,*

*Friendship is non-confrontiers,*

*Aim toward the future, we will do our best to make transportation:*

*More intelligent and effective,*

*Faster and safer,*

*Cleaner and greener,*

*With that objective, by this forum, we together connect, endeavour, research, create, contribute, share and devote.*
